

Puddle Flange Floorwaste-In-A-box

Drillfast's Puddle Flange is an all in one fire collar and recessed puddle flange that can be installed in seconds.

Stocked to suit 200mm slab heights, it is a huge time saver, eliminating the messy cut, prime, glue processes, and reducing the need for unnecessary lengths of PVC piping on site.

The fire collar is the market leading Snap collar.

GET IN TOUCH

Custom solutions are available for all three products and can be built to specification as required.

Other sizes available on request.

Drillfast is proud to introduce to you the creation of its 'In-A-Box' series. Designed to significantly save time and reduce complexity and waste on major plumbing projects.

WHY IT WORKS

The In-A-Box series has been developed in consultation with all trades, it's key benefits include:

Saves time - a 15 minute job can be reduced to 30 seconds. Literally, it can take days out of your working week.

Eliminates the need for on-site construction space for assembly and does away with mess and waste.

Palletised or stillage delivery rather than range of components in different shapes and sizes

Reduces the points of contact required in a typical installation.

Hob-In-A-Box

LOOKING FOR A SMARTER WAY TO SET OUT A BATHROOM:

Then Drillfast's Hob-In-A-Box is the answer. The hob inserts into any bathroom, this includes frame complete with cistern and necessary piping. Simply fit into place and then install hardware. The hob has compatible connections to piping solutions including crimp (Velpex), Sleeve (Veltanium) or threaded connections.

Widely used in Europe and the UK, the hob greatly reduces the required contact points, and will see your team only required for installation and fit-off.

Manifold-In-A-Box

THE MANIFOLD IS A DAY'S WORK IN A BOX.

Order, unpack, install. Ideal for apartment developments and most commercial applications, the manifold can host up to 12 branches (six per side). Save on time, silver solder, copper, labour and bottle rental. Available with open or threaded connection points. No hotworks permits required.
