

THE ECONOMICAL WATER DELIVERY SOLUTION

High-rise development? Look no further for a fast, reliable, consistent and cost effective solution to give you the leading edge!

CXL incorporates a high quality and economical pipe for potable water known as CXL Black.

CXL Black is a PEX pipe produced with crosslinked polyethylene which is designed to offer premium quality, by using the technology of a chemical process that increases the bonds between the macromolecules. This process forms a complex durable structure, that performs under high pressure to provide a very cost efficient and hassle free water piping system for large commercial projects.

CXL Black uses the universal and comprehensive range of CXL DR brass crimp fittings that are very quick to install and also fully interchangeable with CXL GAS and CXL multilayered colour coded blue, red, green and lilac pipes.
