

# RBM MAG-NUS 2

# SELF-CLEANING DIRT SEPARATOR WITH MAGNET FOR HYDRAULIC CIRCUITS

## DESCRIPTION

RBM Mag-nus2 is a self-cleaning dirt separator with magnet suitable for hydraulic systems. It is an extremely innovative product created to remove any type of impurity from heating systems.

RBM Mag-nus 2 is the best solution to solve problems caused by particle pollution, especially rust and sand, formed by corrosion. This device helps maintaining the high efficiency of the system, preventing pipe obstruction and boiler failures.

Through its effective action, the magnet attracts iron particles avoiding damages caused by free movements of these into the system.

Impurities (iron, rust, sand, seaweeds) collected in the filter can be removed through the drain valve. RBM Mag-nus 2 must be installed with the drain valve pointing to the bottom.

## FEATURES

- Removes any impurity
- Self-cleaning
- Excellent hydraulic properties
- Can be mounted on vertical, horizontal and diagonal piping
- Extends boiler lifespan
- Fights corrosion
- Ensures system efficiency
- Limited overall dimensions
