

POLYTAPE

HIGH COMPRESSION RESISTANCE

POLYTAPE® by Drillfast is specifically designed to combine adhesion and expansion in a product which is environmentally sensitive and user friendly. POLYTAPE® as apart from other foam tapes is manufactured with Polyethylene (PE) material which is superior in energy efficiency and Green Star rating, having a Volatile Organic Compound (VOC) of less than 0.05mg/m²/hr.

POLYTAPE® is extremely versatile. With advanced technology, a unique adhesive provides a foam tape that is linerless and performs with excellent insulation properties and fire resistance.

POLYTAPE® is exceptional for its ease of use 'on-site' by eliminating 'installation mess' and maximizing efficiency of installation through waste minimization and environmental management.

FEATURES

- VOC of less than 0.05mg/m²/hr
- No "liner mess"
- Formulated from Polyethylene (PE) for high compression resistance
- Fire resistant to AS1530.3
- Excellent moisture and vapor seal at 10% compression
- Powerful adhesive properties and high tack maintains positioning
