SAFE PALLET SKATE

When you haven't got a forklift handy, FlexiKart steps in as a safe, multi-purpose folding pallet skate.

With a 750kg load capacity, this sturdy trolley is ideal for moving materials around busy construction sites and storing them off the ground. The unit is versatile for bulk bags, bundles, and pallets. Featuring four round folding arms, for universal use with scaffold clamps, and four swivel castors, 2 braked and 2 direction locked, the FlexiKart is easily manoeuvred in any direction. Its size allows it to be navigated through doorways with lashing rings ensuring a safe and secure load.

A robust pallet skate which increases safety and reduces physical strain when manoeuvring loads manually

The FlexiKart can accommodate larger loads, or long loads such as metal beams, wood, pipe, conduit and other materials

Four swivel castors (two are braked), allow the FlexiKart to be easily moved in any direction

Built in lashing points allow loads to be secured, which safely prevents them falling off when manoeuvring

Code	Weight	External Dimensions W x D x H (mm)	Internal Dimensions W x D x H (mm)
30AFK2	62kg	Folded: 1270 x 755 x 395 Unfolded: 1270 x 755 x 1010	N/A
