

## **FASTAROD HUS**

**THE ULTIMATE CONCRETE SCREW ANCHOR**

# THE ULTIMATE CONCRETE SCREW ANCHOR

Ultimate-performance screw anchor for quicker permanent fastening in concrete (carbon steel, internally multi-threaded head).

## FEATURES:

- Higher productivity – less drilling and fewer operations than with conventional anchors
- M8 and M10 internally threaded heads for direct attachment of threaded rods
- Unbeaten for overhead installation – greatly simplifies the work
- More reliable and easy to set – HSE product profile available
- Innovative cutting edge geometry for superior setting characteristics

## APPLICATIONS:

- Various pipe or ventilation system installation applications
- Threaded rod hangers for single or multiple pipes
- Suitable for repetitive installation tasks

|                        |  |
|------------------------|--|
| Material, corrosion    | Carbon steel, zinc-plated                      |
| Head configuration     | Inner thread                                   |
| Socket size            | 13mm   |
| Drill bit diameter     | 6mm  |
| Approvals/test reports | ETA, Fire                                      |
| Base materials         | Concrete (cracked, uncracked), Masonry (solid) |
| Type of fastening      | Pre-fastening                                  |
| Reusable (removable)   | Not possible                                   |
| Installation direction | All  |
| Material composition   | Steel, zinc-plated (min. 5 µm)                 |
| Product class          | Ultimate                                       |
| Product code           | 05HM1040H                                      |
| Quantity box           | 100  |
