

PYRAMID

INNOVATIVE ROOFTOP SYSTEMS

Pyramid rooftop supports are a surface mounted solution for supporting electrical and mechanical applications on a variety of roof surfaces.

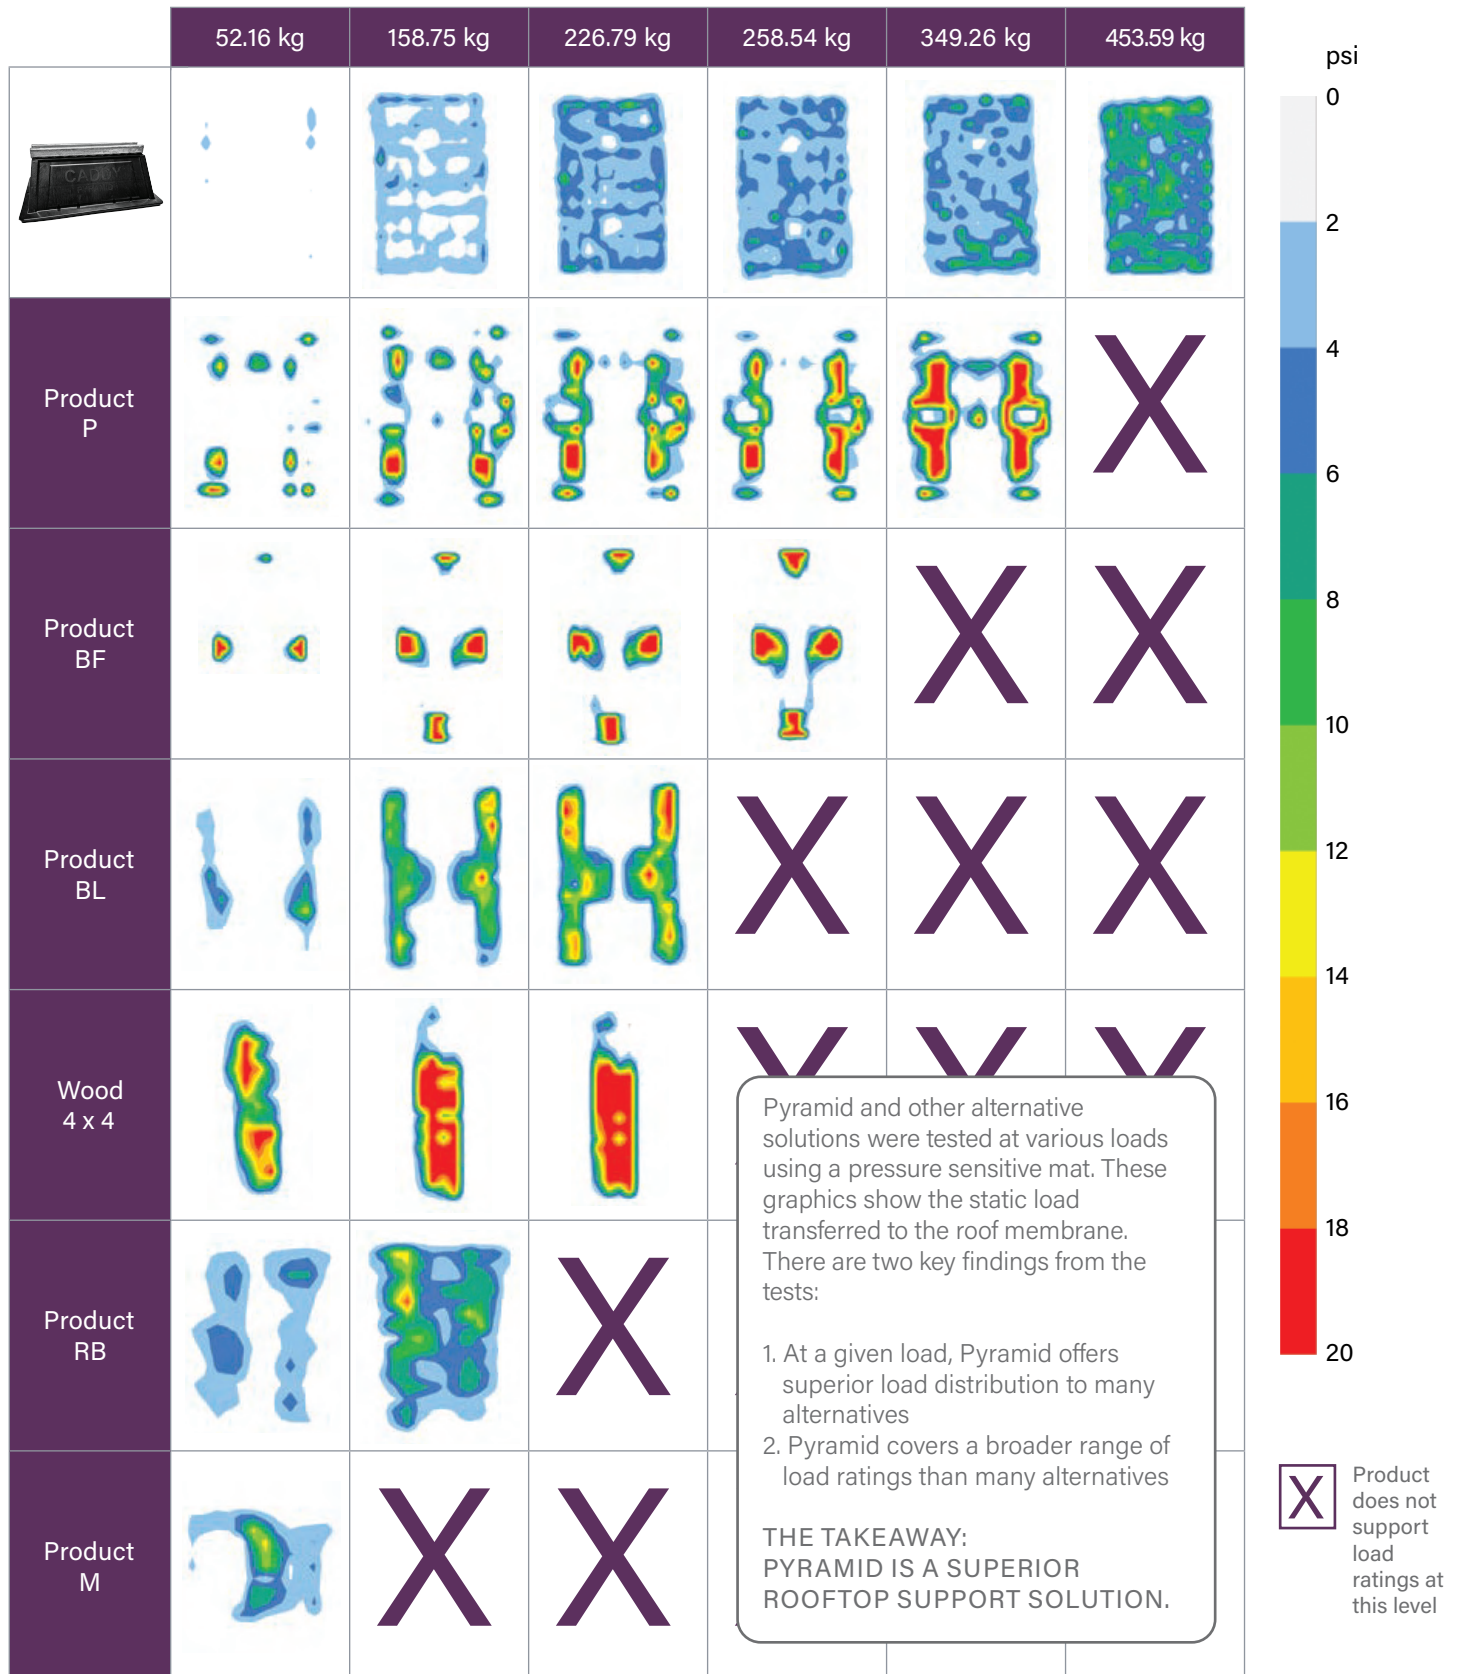

They offer superior load capacity and dramatically reduce installation time by replacing slow, heavy and labor intensive methods of support of pipe, conduit, duct, cable tray and equipment.

Unlike wood block, Pyramid supports are specifically designed for rooftop applications, incorporating unique materials and finishes that protect roof membranes and provide superior corrosion protection.

Pyramid Rooftop Supports come in a range of products to support Plumbing, HVAC, Electrical and Equipment Support applications. Superior load distribution and a low abrasion foam interface combine to ensure that the roof membrane is protected despite varying roof surfaces and shifting caused by expansion and contraction.

Supports are available for many applications. Please contact us to discuss your site needs.

ROOFTOP SUPPORTS: LOAD DISTRIBUTION

INNOVATIVE ROOFTOP SYSTEMS

UV stabilized for long lasting performance

Hot-dip galvanized for superior corrosion protection

Foam bottom offers low abrasion interface for better roof membrane protection

Compatible with roof surfaces including single ply, bituminous, metal and spray foam
