

TEF GEL CORROSION ELIMINATOR

THE ULTIMATE LUBRICANT

PREAPPLICATION & APPLICATION:

Before application, all surfaces, must be free from any previous corrosion, dust, dirt and any other chemical contaminants. If necessary, prepare all surfaces with mineral spirits.

Tef-Gel™ must be applied liberally to all surfaces prior to assembly including threaded fasteners and flat surfaces of hardware including washers. Failure to adequately apply Tef-Gel™ will result in a reduction of protection.

BENEFITS:

- Prevents corrosion between dissimilar metals
- Industrial grade, non hazardous, assembly lubricant
- Protects electrical connectors
- Will not cold flow or dry out, giving long term protection of hardware for future disassembly
- Resistant to salt water & detergents
- Contains PTFE (Teflon®) and 0% volatile solvents, no silicones, or petroleum solvents to evaporate
- Indefinite shelf life
