KWIK-FLEX

ENERGY-EFFICIENT, QUICK INSTALLATION

DESCRIPTION

Kwik-Flex (21KWIKFLEX) is a flexible duct-hanging support system designed to meet the installation requirements of Australian Standard (AS/NZS) 4254.1 (2012) for use in all Commercial and Industrial applications.

Studies in both Australia and the USA show that there can be up to 40% thermal energy losses in flexible ducting due to poor installation practices.

KEY BENEFITS

- Complies with the new, updated Australian Standard AS/NZS 4254.1 (2012)
- Meets Building Code of Australia (BCA) / National Construction Code (NCC) requirements
- Tested to Australian Standard AS 1530 part 3
- One size Kwik-Flex fits flexible duct from 100-600mm
- Ensures the efficient operating of your ducted air-conditioning, heating or evaporative cooling system

Commercial Installation

Individual Support

Box of Kwik-Flex

KEY FEATURES

- High tear strength
- Tested to hold up to 30kgs
- Can be removed and reused
- Provides a professional installation
- Saves installation time and labour costs
- UV Stable
- Lightweight
- Cost effective
- Guaranteed for 10 years
- Extremely easy to use/install
